

by Joshua Cappel & Adam Gertzbein

You are an apprentice to a great sushi master, and you have spent the last ten years honing your skills in preparation for this day—your final test before earning the title of expert chef: Itamae-San. Sushi is about culinary expertise, and you must always strive to master your skills while serving an array of vivid colors, mouthwatering tastes, and creative combinations. The test will be difficult. You must compete against the other hopefuls, all working in the same confined area to produce recipes of varying complexity. Only one of you will earn the respect of your teacher, and the revered title of Itamae-San!

## OBJECT OF THE GAME

The object of *Wasabi!* is to prepare sushi by laying ingredients onto the board, earning points by matching your recipes, meeting your challenges—and trying to do it all with style! Success will earn you your choice of useful Action Cards. When the board fills up, the player with the most points wins—but an extremely skilled chef could achieve an early instant victory by completing ten challenges before the board fills up. Balancing speed with technique will be crucial if you plan to win the contest!

## COMPONENTS

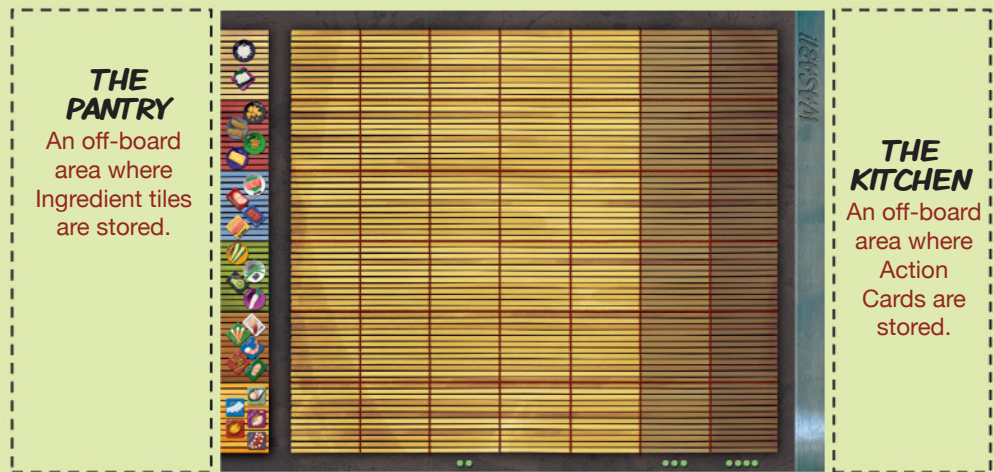

### 72 INGREDIENT TILES

Called **Ingredients** throughout the rules. Square tiles representing different sushi ingredients, such as Salmon, Avocado, Maki, etc.

### THE BOARD

A large grid which is the playing surface. You will use a specific zone of the board depending on how many players are in the game. With 2 players use only the lightest 5 columns. With 3 players add the next darker column. With 4 players use all 7 columns. The green dots on the board are a reminder of which area you should use.

#### THE PANTRY

An off-board area where Ingredient tiles are stored.

#### THE KITCHEN

An off-board area where Action Cards are stored.

### 40 CHALLENGE TOKENS

10 Tokens per player in their color. Each Token **length-side** displays a Recipe length, a point value, and how many Wasabi Cubes you earn for completing the sushi **with style**. (explained later) Each Token **point-side** shows only the point value.

### 10 ACTION CARDS

Cards that give a special ability to the player who plays them. There are 2 of each type.

### 52 RECIPE STRIPS

Called **Recipes** throughout the rules. Strips that display the Ingredient tile combinations used to make sushi recipes. There are Recipes with 2, 3, 4, and 5 parts.

### WASABI CUBES

Cubes that each represent 1 bonus point. They are earned for completing Recipes with style, and by playing the dreaded *Wasabi!* Action Card.

### 4 BOWLS

For players to store their Wasabi Cubes.

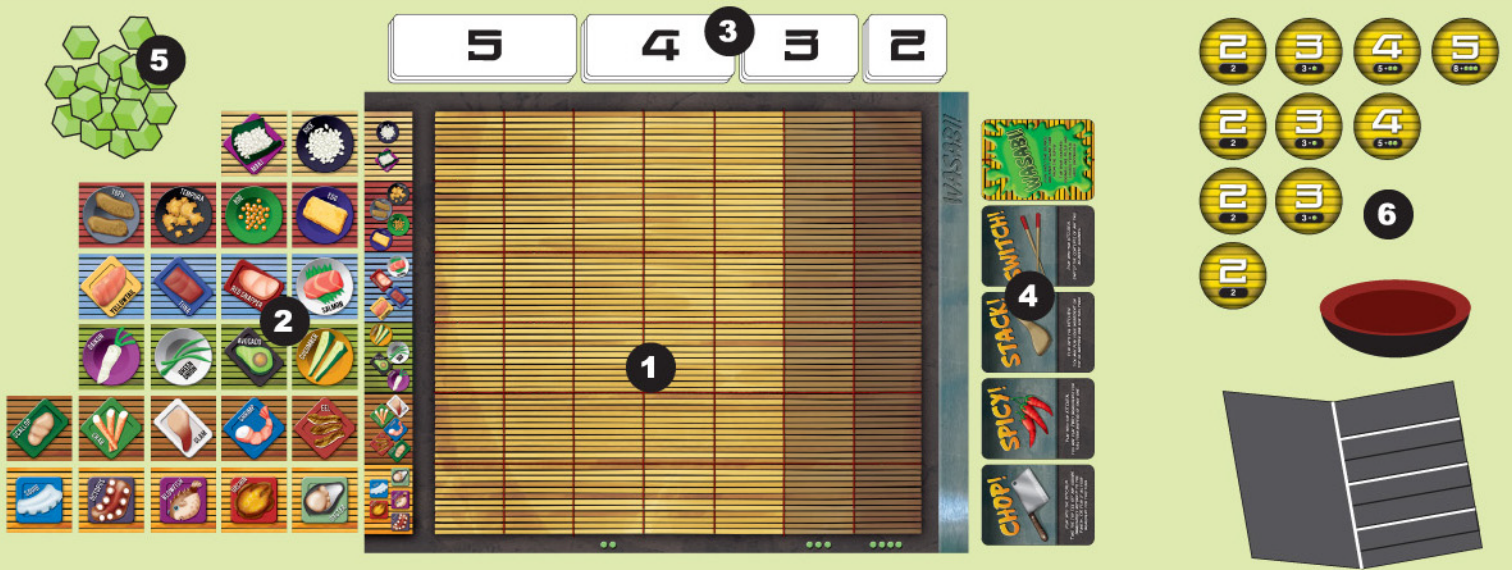

### 4 SCREENS

Small boards that each player uses to organize and conceal their Ingredient tiles, Recipe strips, and Action Cards.

## SETUP

1. Place the Board in the center of the table.
2. Sort the Ingredients by type and stack them in the appropriate area of the Pantry. There are six different categories of Ingredients, identified by background color.
3. Separate the Recipe strips by length, and place them face-down in shuffled stacks near the board.
4. Place the Action Cards face-up in the Kitchen. (Their arrangement within the Kitchen is not important.)
  - a. For a **2-player** game use **1 of each** Action Card type (5 cards total)
  - b. For a **3-player** game use these 7 Action Cards: **2 Wasabi!**, **2 Spicy!**, **1 Chop!**, **1 Switch!**, and **1 Stack!**
  - c. For a **4-player** game use **all 10** Action Cards
5. Gather all of the Wasabi Cubes into a supply near the board.
6. Give each player a Screen, a Bowl, and all 10 Challenge Tokens of one color. Any remaining Token sets, Bowls, or Screens are not used. Set up your Challenge Tokens on the table in front of you **length-side up** so that everyone can easily see them. Stand up your Screen so that you can conceal items behind it.

## GETTING STARTED

Choose a starting player. If you are the starting player:

1. Heeding the *Rules For Starting Hands* (see the explanation to the right), take **3** Ingredient tiles from the Pantry and pass them to the player on your left. This is their **starting hand**. Players may hide their hand behind their Screen. Proceeding clockwise, each player does the same until everyone has a starting hand.
2. Take **3** Recipes (of whatever lengths you wish), and slip them into the slots in your Screen. You may look at each Recipe as you draw it before drawing the next. Proceeding clockwise, each player does the same until everyone has their three Recipes.

When everyone is ready the game begins.

### RULES FOR STARTING HANDS

All 3 Ingredients in each starting hand **must** be from different categories.

**No** Rice, Maki, or unique Ingredients allowed in starting hands.

## GAMEPLAY

The game plays in turns, clockwise from the starting player. Your turn is broken down into two simple steps, played in this order:

### Step 1: You **MUST** play an Ingredient tile, and you **MAY** play an Action Card.

*You may choose to Pass instead. Skip Step 1 entirely, and discard some or all of the Recipes from your Screen. Discarded Recipes go to the bottom of the stack they originally came from. Then continue with Step 2.*

### Step 2: Prepare for your next turn.

## STEP 1: PLAYING YOUR INGREDIENT TILE AND ACTION CARD

You **must** lay exactly one Ingredient tile from your hand onto **any** unoccupied square of the board. (Make sure to stay within the play area as dictated by the number of players.)

You **may** play an Action Card during Step 1. (**Maximum 1 per turn.** Depending on the Action Card itself, you might play it either before or after you lay your Ingredient tile.) See the *Action Cards* section for details on all 5 different Action Cards.

If, on your turn, you create an uninterrupted straight-line vertical or horizontal Ingredient sequence on the board that matches one of your Recipes, you have **completed a Recipe**. (The sequence can include tiles previously placed by **any** player, so long as **you** are responsible for the tile that completes the sequence. Tiles adjacent to the sequence in all directions are irrelevant.) **You may only complete a Recipe of a given length if you have an unassigned Challenge Token of that length.**

The sequence of Ingredients does **not** have to be in the exact same order as that shown on the Recipe strip. If it **is** in the exact same order, you have completed the Recipe **with style**, which will award you bonus points for Recipes of a length greater than 2.

Recipes will usually be completed by laying down Ingredients, but some effects of Action Cards can result in completed Recipes as well. (See the *Action Cards* section for those instances.) It is possible to complete more than one Recipe on a single turn, through clever tile placement and Action Card use.

### RECIPE COMPLETION

After completing a Recipe, remove the Recipe strip from your Screen and lay it face-up in front of you where everyone can see it. Assign a Challenge Token (of the correct length) to the completed Recipe by placing it on top of the Recipe strip with the **point-side up**. If you completed the Recipe **with style**, take the indicated number of Wasabi Cubes from the supply and put them in your Bowl. *Reminder: If you do not have an unassigned Challenge Token of the correct length, you **may not** complete a Recipe of that length.*

- Once you have completed a recipe and assigned a Challenge Token to it, it can never be taken away from you, even if the layout of the board changes.

**Recipe Completion Example:** You have completed the *Pickle Barrel* Recipe. Remove the strip from your screen and place it in front of you. Since it is a 3-part Recipe, take one of your unassigned 3-length Challenge Tokens and **assign** it to the completed Recipe by placing it **point-side up** on the Recipe strip. The point values of such assigned Challenge Tokens will go towards your final score when the game ends. If you had completed the *Pickle Barrel* **with style** (that is, in the exact same order as shown on the strip), you would take the number of bonus Wasabi Cubes indicated on the length-side of the Challenge Token, which in this case is 1 cube.

## STEP 2: PREPARING FOR YOUR NEXT TURN

You must prepare for your next turn in the following order:

- 1) Action Cards**—Collect 1 Action Card as a reward for every Recipe that you completed on this turn. You may select Action cards from the Kitchen, and/or pick up any *Wasabi!* Cards that are on the board. You may **not** select an Action Card of the same type that you played on this turn, unless there is no other option. You may **never** have more than 2 Action Cards in your hand. (You can discard Action Cards into the Kitchen at any time if you want to make room in your hand for a newly-earned one.) You may conceal your Action Cards behind your Screen if you wish.
- 2) Ingredient Tiles**—If you have fewer than 3 Ingredients in your hand, you must draw fresh Ingredients from the Pantry (whichever Ingredients you want) until you have 3.
- 3) Recipes**—If you have fewer than 3 Recipes in your Screen, you must draw new recipes (of whatever lengths you wish) from the stacks and add them to your Screen. If you are drawing more than one, you may look at each drawn strip before drawing the next.

Your turn is now over and play continues with the next player to your left.

**Completing Example:** You have the *Crunchy Tuna* Recipe in your Screen, an unassigned 3-length Challenge Token, and a Tempura Ingredient in your hand. You place the Tempura on the empty square between the Maki and Tuna that are already on the board, creating a straight-line sequence that matches the *Crunchy Tuna* Recipe. Even though they are not in the exact same order as on the strip, you have **completed a Recipe!**

**Multiple Completing Example:** You have the *Pickle Barrel* and *Tekkamaki* Recipes, unassigned 2-length and 3-length Challenge Tokens, and a Maki Ingredient in your hand. You place the Maki on the square indicated. This allows you to complete **both** of those Recipes! In addition, since the 3-part *Pickle Barrel* sequence matches the strip exactly, you will earn a Wasabi Cube for completing that Recipe **with style!**

- 1) Earn 1 Card per completed Recipe—maximum 2 in hand

- 2) Fill to 3 Ingredients

- 3) Fill to 3 Recipes

## GAME END AND DETERMINING A WINNER

The game is over when one of two things happens:

- A) Instant Win!** If one player assigns **all 10** of their Challenge Tokens to recipes that they have completed, the game ends immediately and that player is the winner, regardless of how many points everyone has earned!
- B)** If, at the **end** of a player's turn, all squares on the board are filled, either with an Ingredient or part of a *Wasabi!* Card, the game ends immediately. All players count up their points (**assigned Challenge Token points plus 1 point for each Wasabi Cube**), and the player with the most points wins!

In the event of a tie for most points, the winner is the tied player with the **most Wasabi Cubes**. If the result is still a tie, the game ends in a draw.

### Game End B Example:

There is only one empty square left on the board. (All of the rest contain Ingredients or are covered by part of a *Wasabi!* Card.) On your turn, you play an *Egg* tile into the final square, which fills up the board. At the end of your turn, (the **very end**—remember to perform Step 2,) the game ends immediately. All players add up their points. Having completed the five recipes shown, (worth **8+3+5+2+2**), and with **3 Wasabi Cubes** in your Bowl, your final score is **23**.

**Note:** If you had completed a Recipe by placing the Egg, and if you had chosen to pull the *Wasabi!* Card off the board as your reward during Step 2, the board would **not** have been full at the end of your turn, and so the game would not have ended just yet.

## ACTION CARDS

There are 5 different types of Action Cards: *Chop!*, *Spicy!*, *Switch!*, *Stack!*, and the dreaded *Wasabi!*. You start the game with no Action Cards, but earn them by completing Recipes. When you play an Action Card on your turn (**maximum 1 per turn**), you can take advantage of its special ability.

Play **Stack!** into the Kitchen **before** you play your Ingredient. You may now place this turn's Ingredient **on top** of another Ingredient already on the Board, instead of into an empty square, creating (or adding to) a **stack**. A **stack** is any 2 or more Ingredients on the same square. The top Ingredient of a stack is the only one in play. Players may peek at hidden tiles in any stack.

Play **Chop!** into the Kitchen, either **before or after** you play your Ingredient. You may take any one Ingredient off the board. If you *Chop!* a stack, you may only take the **top** Ingredient from the stack. You may do one of two things with the chopped tile.

- A)** Immediately return it to the pantry.
  - or
  - B)** Play it as your Ingredient for this turn. (Only if you haven't already played your Ingredient for this turn.)
- You may complete a Recipe by using *Chop!* on a stack to **reveal** a hidden Ingredient.

Play **Spicy!** into the Kitchen, either **before or after** you play your Ingredient. You may play a **total** of two Ingredients on this turn, instead of one as normal. All normal rules apply to both tiles.

Play **Wasabi!** onto the board either **before or after** you place your Ingredient, so that it covers exactly 4 squares of the board (any or all of the 4 squares may be occupied or empty). **Immediately take 1 Wasabi Cube from the supply and add it to your Bowl**. The covered squares are completely locked from play until the *Wasabi!* Card is removed. This means that:

- No Ingredient may be played into any of the covered squares.
- You may not complete a Recipe if any of the Ingredients that make up the Recipe are covered.
- No covered square may be affected by any other Action Card.

A square covered by part of a *Wasabi!* Card counts as **filled** for endgame purposes. *Wasabi!* cards may not be placed to overlap each other even partially. Players may peek at tiles hidden underneath *Wasabi!* Cards in play.

The only time a *Wasabi!* card comes off the board is if a player (**any** player, not limited to the player who placed it) chooses it during Step 2 of their own turn as a reward for completing a Recipe during Step 1.

Play **Switch!** into the Kitchen, either **before or after** you place your Ingredient. Immediately select two adjacent squares on the board and switch their entire contents. (Either square may be filled or empty.) You may complete a Recipe by moving Ingredients into place in this way.

## CREDITS AND THANK-YOUS

### Wasabi! Game Design by Joshua Cappel & Adam Gertzbein Graphic Design and Illustration by Joshua Cappel

Sincere thanks, for playtesting and rules-wrangling, to Helaina Cappel, Alexa Feldberg, Aaron Cappel, Justine Shiell, Dana Cappel, Tal "House Rules" Gutstadt, Shona & Andrew Gryfe, David Cooper, and Jim Cote. Also to the entire Gertzbein, Cappel, and Waisbord families, for countless weekends of board-game goodness at the cottage. Special thanks to the entire community at the Board Game Designer's Forum ([www.bgdf.com](http://www.bgdf.com)) for constant inspiration and creative conversation. And of course to Zev Shlasinger, for believing in a silly little game about makin' sushi.
